

Medunik Canada signs an exclusive agreement with HRA pharma for commercialization of Lysodren® (mitotane) in Canada, for the treatment of inoperable adrenal cortical carcinomas

BLAINVILLE, QC (CANADA), January 16, 2019 — Medunik Canada, a company dedicated to improving the health and quality of life of Canadians living with rare diseases, is proud to announce the signing of a licensing and supply agreement with HRA Pharma. The agreement grants Medunik Canada exclusive commercial rights in Canada for Lysodren®, indicated for the treatment of inoperable functional and non-functional adrenal cortical carcinoma.

"We are particularly proud to add Lysodren® to Medunik Canada's portfolio of specialty products and treatments for orphan diseases. This addition is our first foray into the field of oncology and heralds great things in the near future, as we pursue our mission to support Canadian patients. In addition, with the launch of Lysodren®, we are embarking on a partnership with HRA Pharma, a French company that is a leader in women's health and endocrinology," affirmed Dany Hallé, Vice President, Commercial Affairs, Medunik Canada.

Adrenocortical cortical carcinoma (ACC)

Adrenal cortical carcinoma (ACC) is a rare disease. It is caused by a cancerous proliferation in the adrenal cortex, which is the outer layer of the adrenal glands. They play an important role in the endocrine system.

Lysodren® is used to treat people with advanced adrenal cortical carcinoma.

Indication

Lysodren® (mitotane) is only indicated for the treatment of inoperable functional and non-functional adrenal cortical carcinomas.

Contraindications

Lysodren® is contraindicated in patients with known hypersensitivity to mitotane or any other ingredient in the product.

Cautionary statement

Lysodren® should be administered under the supervision of a physician experienced in the administration of antineoplastic chemotherapeutic agents.

For more information about Lysodren®, please refer to the Product Monograph.
